Agricultural Statistics of India

1920-21

VOLUME II—INDIAN STATES

Introductory Note

This volume deals with statistics for Indian States as far as reported. ^{General} As in the previous issues, summary tables have been inserted to show the total figures relating to area, the classification of area, and the area under crops for each State or group of States, and the totals for all the reporting States. The total number of cattle as far as reported in each of the years 1906-07 to 1920-21 has also been included in the general summary table (No. 1). These statistics are defective for comparative purposes, as additions have been made in the number of reporting States from time to time. The States of Dholpur, Rampur, and Tehri-Garhwal have for the first time furnished figures for 1920-21. Details for ten years have been added in each table for groups of States. Two charts and an index for easy reference have been added to the volume.

It should be noted that, for the reasons explained below, the agricultural statistics of Indian States are incomplete and are of far less accuracy than those of British Provinces published in Volume I. As these States comprise one-third of the total area of India, the importance of their statistics in the all-India returns can scarcely be over-estimated.

The total area of Indian States is approximately 496,000,000 acres (775,000 square miles), with a population of 73 millions according to the census of 1921. These are divided for the purposes of agricultural statistics into two main classes, namely, (1) States within the jurisdiction of Local Governments and Administrations, and (2) States having direct political relations with the Government of India.

(1) *States within the jurisdiction of Local Governments and Administrations.*—The total area of these States is 181,125,000 acres, with a population of 30 millions. They are divided into the following main groups:—

	Area in thousand acres	Population Thousands
Bombay and Sind States	40,878	7,109
Madras States	6,846	5,460
Punjab States	24,511	4,416
Bihar and Orissa States	18,335	3,960
Central Provinces States	19,960	2,067
North-West Frontier Province States (including Tribal areas)	16,320	2,825
Burma States (including Shan States)	38,780	1,497
United Provinces States	4,318	1,135
Bengal States	3,477	897
Assam States	7,970	384
Total	181,125	30,050

The total area of all these States (with the exception of the greater part of the South Shan States and Karenne in Burma and the Tribal areas in the North-West Frontier Province) is included in the areas of the respective British Provinces stated in column 2 of table I of Volume I (British India), but is shown separately in column 3 of that table in order to arrive at the net area of British territory (in column 5) dealt with in that volume. Of these States,

agricultural statistics are at present available only for the following thirty-eight States in the Madras and the Bombay Presidencies, the Punjab, and the United Provinces, and are dealt with in this volume :—

The total area of all the sixty reporting States named above amounts to 255,352,000 acres,* with a population of 48 millions. These States, therefore, represent 51 per cent of the total area, and 66 per cent of the total population, of all the Indian States.

The earliest years from which the statements of agricultural statistics have been received from these sixty reporting States are noted below :—

Mysore	1886-87
Jaipur	1892-93
Gwalior	1896-97
Bikaner, Marwar, Tonk	1898-99
Alwar, Bharatpur, Kishangarh, Jhalawar, Kotah	1900-01
Indore, Rajgarh, Narsingarh, Nagod, Patiala, Jind, Nabha, Bahawalpur	1907-08
Pudukkottai, Banganapalle, Sandur, Cochin, Travancore, Bhopal, Barwani, Sirmur, Kalsia, Pataudi, Loharu, Dujana, Kapurthala, Malerkotla, Faridkot, Simla Hill States (12 in number)	1908-09

The returns for the different States relate to the years ending on the dates stated below, so far as information is now available :—

Bikaner, Sandur, and Banganapalle	year ended 31st March
Jath, Phaltan, and Aundh	June
Mysore, Baroda, Pudukkottai, Cochin, Travancore, Gwalior, Indore, Narsingarh, Nagod, Bikaner, Kishangarh, Bharatpur, Kotah, Patiala, Dharampur, Benares and Tehri-Garhwal	30th June
Bundi	19th July
Sachin	31st July
Jaipur	31st August
Marwar, Jhalawar, Bhopal, Barwani, Rampur and Dholpur	30th September
Hyderabad	5th October
Tonk, Rajgarh, Alwar	31st October

From the total area of all the sixty reporting States (255,352,000 acres*), deduction must be made of 122,603,000 acres for which statistics are

* The difference between this figure and the total area as shown in column 2, Table I on page 12 is due to the inclusion of complete area figures for Barwani and Simla Hill States from the Census of 1921.

not available. These comprise chiefly unsurveyed areas and lands held on jagir, muafi, and other privileged tenures. The net area actually covered by these statistics is, therefore, only 132,749,000 acres by professional survey,* or 132,969,000 acres according to village papers.†

unculturable, or covered by buildings, water, and roads, or otherwise appropriated to uses other than agriculture, amounts to 23,811,000 acres or 17.9 per cent. The balance, 91,819,000 acres or 68.9 per cent, represents the area available for cultivation. Of this, 18,032,000 acres, or 13.5 per cent of the total area, represent culturable waste, *i.e.*, land available for cultivation but not taken up, and 19,615,000 acres, or 14.7 per cent, were kept fallow in the year under report. The net area actually sown in the year was thus 51,172,000 acres (40.7 per cent of the total area). This net area sown, however, excludes areas sown more than once in the year. If areas sown more than once (as noted below) are taken as separate area for each crop, the gross area sown in the year of report amounts to 57,236,000 acres.

Table III,
Area under irrigation

The total area irrigated in the reporting States during 1920-21 was 8,145,000 acres, as against 8,309,000 acres in the preceding year. Of this, 2,401,000 acres were irrigated from Government canals, 835,000 acres from private canals, 1,158,000 acres from tanks, 2,024,000 acres from wells, and the remaining 1,727,000 acres from other sources of irrigation. These figures, however, do not take into account areas sown more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. If areas sown more than once are counted as separate area for each crop, the gross area of irrigated crops amounts to 10,922,000 acres. Of this area, 9,525,000 acres were under food crops.

Of the non-food crops, oilseeds occupied 4,139,000 acres or 7.4 per cent of the total area sown, fibres such as cotton, hemp, etc., 5,201,000 acres or 9.2 per cent, and fodder crops 2,094,000 acres or 3.7 per cent. The other non-food crops, namely, dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.), and miscellaneous non-food crops together, covered some 1,384,000 acres or 2.4 per cent of the total.

The total extent of land on which more than one crop was raised during the year was 3,064,000 acres.

* For explanation of the terms "professional survey" and "village papers," see footnotes to Table I (page 6) of this Volume and the Note prefixed to Volume I.
† See footnote (d) on page 24 of the Tables.

Table V is prepared by forty-eight States, namely, Hyderabad, Mysore, Baroda, Gwalior, Kashmir, Pudukkottai, Banganapalle, Sandur, Cochin, Travancore, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Nagod, Bikaner, Marwar, Jaipur, Kishangarh, Alwar, Bharatpur, Jhalawar, Tonk, Kotah, Bundi, Dholpur, Jath, Phaltan, Aundh, Sachin, Bhavnagar, Dharampur, Benares, Rampur, Tehri-Garhwal, Jhabua, Jobat, Sailana, Ali-Rajpur, Piploda, Dewas (Junior), Maihar, Chhatarpur, Dhar, Rutlam, Panna, and Karpurthala. The numbers of ploughs and carts are 4,280,000 and 1,185,000, respectively.

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in Southern India. In States where there has been no professional survey, the figures are based on the best available information.

Column 3.—In this column is deducted the entire area for which the statistics required for Tables II and IV are not forthcoming in whole or in part. This area comprises chiefly estates held on privileged tenures, which have not yet been surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organization of village statistical establishments develops, the area in this column is reduced, and that entered in the next column (4 and 5) and dealt with in Tables II and IV is correspondingly increased.

Columns 4 and 5.—Column 4 is a check on the accuracy of column 3. In the latter, "village papers" mean "the papers prepared by the village accountants." In States where no village papers exist, or where the source of information is the same for both the survey and the village papers, the figures in column 4 are necessarily repeated in column 5. The area in village papers may differ somewhat from that given by the Survey Department, (a) because, while the survey area is calculated in blocks, the area by village papers represents the actual total of field and village areas, and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads is not always uniform in the two sets of returns.

(a) See footnote (a) on page 14.

(b) See footnote (a) on page 16.

These represent about 86 per cent of the aggregate area of all the States comprised in the group. The returns, however, relate only to the settled portions of the reporting States, except Bilaspur, Baghal, and Mehlog, for which complete returns have been received. Column 2 states the area of the settled portions of the States named above, except Bilaspur, Baghal, and Mehlog, for which the whole area is included.

Column 2.—The definition of the term "forests" is as follows:—"Any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area sown), an explanation being given in a note.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the area sown. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

(a) The statistics collected in 1908-09 have been repeated up to 1912-13, as fresh information could not be collected owing to pressure of work connected with the revenue settlement of the State.

(b) See footnote (c) on page 24. (c) See footnote (d) on page 24.

Column 2 states the areas of state and district forests and of plantations.

Column 3 includes not only lands absolutely unfit for cultivation, but also lands reserved for pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 3 to 5 or 6 as the case may be.

Column 4 states unoccupied assessed waste.

Column 5.—There is no system of fallows, that is, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For purposes of account the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is taken as fallow. The lands occupied and assessed are sometimes unfit for cultivation, having been taken up on full assessment merely for use as pasture, but the exact area of all such lands cannot be ascertained, although it cannot be large.

Note—In this table are entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by higher authorities.

(a) See footnote (b) on page 91.

(b) Includes millets maize and gram.

Entry 2 (a) — Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population (head 10). Areas should not be entered in this column merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons.

Entry 3 — This column should be sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste.

Entry 1—Where land revenue includes the zamindar's share, the net demand should be entered, and the table should state the payments due by the zamindars to Government, not those by the raiyats to the zamindars. The actual realisable demand on account of the year should be entered, after excluding arrears for past years. This column should include all the heads classed as "Land Revenue" in the Civil Accounts.

Entry 5—The population in entry 5 is that of the last general census.

** Entry 7—As in entry 1, but only ordinary land revenue on fully assessed areas is to be entered
